

SCIENTIFIC NAME

Cedrela odorata

LOCAL NAME

Cedro

Profile

Heartwood is a relatively uniform light pinkish to reddish brown; colors tend to darken with age. Random pockets of gum and natural oils are commonly present. Grain patterning and figure tends to be somewhat bland.

Air Dried Sawn Beams & Blocks:

- Air Dried
- Length: Max: 5.5M
- Width: up to 400mm depending on species
- Thickness: up to 400mm depending on species

Specification

Strength:

Low/Medium

Natural:

Durability High

Shrinkage:

Small

Movement in Service:

Small

Forest Availability:

Plantation Species

Forest Availability:
